

Matthew Jones, P.G., Geologist

Mr. Jones has over 16 years of professional experience in the environmental industry and has assisted in and /or managed numerous projects with USEPA, US Navy, multiple state, and county agencies. His vapor intrusion experience includes technical recommendations on investigations, sampling techniques, data evaluation, mitigation, and remediation. Mr. Jones has successfully worked with shareholders on multiple high profile sites to effectively mitigate indoor air issues via utilization of sub-slab depressurization systems for existing buildings and those undergoing new construction. Mr. Jones's vapor intrusion experience is primarily focused on sites with a chlorinated vapor intrusion component in addition to sites impacted with petroleum hydrocarbons.
